About DAB+ digital radio

DAB+ is the digital radio standard of choice across Europe and Asia Pacific.

Over 68 million receivers have been sold worldwide and 42 countries have DAB services on-air.

Last year Norway became the first country to switch off national FM services, with Switzerland to begin its digital switchover process in 2020.

Political commitment to DAB+ continues to go from strength to strength, particularly in Belgium, France, Germany, Italy, The Netherlands, Switzerland and the UK.

With momentum for DAB+ growing across the rest of Europe and Asia Pacific, now is the time to embrace the opportunity.

About WorldDAB

WorldDAB is the global industry forum responsible for defining and promoting DAB digital radio. By bringing together radio industry professionals, WorldDAB provides knowledge and expertise that helps countries successfully adopt and implement broadcast digital radio.

Our 100-plus members cover 29 countries across the globe and include public and commercial broadcasters, regulators, network providers and manufacturers of receivers, chips, professional equipment and automobiles.
